

# CMS Token Listed and Now Trading on Estonian Exchange Exrates

TOKYO – January 15, 2021 – Today Tech Bureau Holdings, Corp., a fintech and cryptocurrency solutions company, announced that [Exrates](#), an exchange based in Estonia, has listed CMS token and is now available on the exchange.

## About this listing

Both of COMSA tokens, CMS:ETH and CMS:XEM, are now listed and traded on Exrates, an exchange based in Estonia.

CMS:ETH and CMS:XEM are displayed with the ticker symbols “CMSE” and “CMSX” respectively on Exrates. There are three currency pairs available: BTC, ETH, and USDT.

This will make it easier for users outside of Japan to trade CMS tokens and increase its liquidity.

In the future, we aim to further increase the liquidity of CMS tokens by making them available on other exchanges. In addition to our efforts to increase liquidity, we are also looking into supporting services that allow users to exchange more currencies, as well as partnerships that allow users to not only exchange but also use their tokens in services.

## ■ About COMSA

COMSA offers a one-stop solution, providing clients with consultation, expertise and solutions to support their ICO campaigns and implementations of blockchain technology into their businesses. It is an integrated platform that corporate clients can use to fundraise by selling tokens, or tokenizing corporate assets. Tech Bureau Holdings, Corp. exclusively provides these services as a one-stop solution with mijin as the underlying blockchain technology.

## ■ About ICOs and ICOs in Japan

ICO stands for Initial Coin Offering which are often called “token sales”. With this method, a company or project can sell assets digitally as electronic tokens to raise funds from the public. In Japan, utility tokens sold in ICOs are considered to be “cryptocurrencies sold to unspecified persons” under the Payment Services Act, such that selling activities may not be undertaken unless registered as Cryptocurrency Exchange Services with the relevant local finance bureau. The legal characteristics of ICO tokens must be reviewed on a facts-and-circumstances basis, so that they might be treated as Securities, or more specifically the Collective Investment Scheme, and be regulated under the Financial Instruments and Exchange Act of Japan.

## ■ About Tech Bureau Holdings, Group

Tech Bureau Holdings, Corp., fintech and cryptocurrency group companies in Japan, the U.S., and Europe, develop software and services for cryptocurrency technology and blockchain technology, a so-called "Crypto-Fintech Lab". As a team and as a group, we have developed mijin, a private blockchain software. Tech Bureau Holdings, Corp. recently launched a one-stop solution, COMSA, which provides companies with consultation, expertise, and solutions to support their very own ICOs and implementations of blockchain technology into their businesses.
